

"Gorgeous DIY Feather Wreath"

Designed by: Amber Packer (www.amberpacker.com)

Gorgeous – Seriously gorgeous DIY feather wreath you CAN make yourself – and for under \$20!

Materials:

- Felt squares – 6 (or ¼ yard 48" wide felt)
- Feather packages – 8 (color: rain)
- Wreath form – 18"
- 1 ½" wide satin ribbon – 8 ft.

Also used:

- Hot glue, glue gun, flat head pins, scissors or rotary cutter

Instructions:

Felt: \$1.50 (6 pieces at \$0.25 each)

- Cut 2" x 12" strips of felt from the felt squares. You will need about 22' total or 22 – 2" x 12" strips.
- If you are using felt by the yard, cut the equivalent.
- Wrap felt around the wreath form and hold in place using push pins as needed.
- This step helps to provide a finished, professional look.

Feathers: \$12.60 (8 packages \$1.99 each – 30%)

- Glue feathers to wreath form with the feathers curving away and out from the wreath.
- ***I only used the medium to large sized feathers***
- Alternate the position of the feathers, filling in gaps.
- I ended up spacing the feathers closer that I intended because I wanted a full wreath. You will use fewer feathers if you space them farther apart.

**Ribbon: \$1.50 (on sale 50% off)**

- Cut the following lengths of 1 ½" ribbon: 3 ½", 9, 15 ½", and two 32"
- Wrap the 15 ½" piece around, overlap slightly and glue together.
- Wrap the 3 ½" piece around folded 15 ½" piece. Overlap and glue in the back covering the seam.
- Cut a "v" from one end of each 32" ribbon pieces. Glue together at a slight angle.
- Adhere long ribbon pieces to back of bow.
- Add 9" piece to top of wreath using glue and push pins to hold in place.
- Hang wreath and let the wreath settle and hang normally. This ensures the bow is in the right place.

- Add bow to wreath using pins. (Do not flatten against wreath)
